Good , understandable and applicable Project

the preparatory phases were fast and useful for other projects too.

N/A

Everything is going as scheduled. Also the coordinator is well organized and explains everything very well.

Everything I found in the documentation seems clear and understandable. It is also easy to transfer all information to local stakeholders.

Management and coordination of Let us think green project is very practicable and is easy

Some questions in this form repeat. I need some more time to get used to the Trello platform but in general everything is fine. We receive information from the coordinator in a clear way

the preparatory phases were fast and useful for other projects. We hope to improve together
